Astraprom d.o.o. is a privately owned company established in 1994, headquartered in Viškovo, Croatia. Its core business is the distribution of spare parts and industrial components from leading global manufacturers for industry, crafts, and maintenance operations. The product portfolio includes bearings, electric motors, gearboxes, power transmission belts, conveyor and transmission chains, adhesives and lubricants, sealing solutions, and linear motion technology.

BUSINESS POLICY

Our business policy is built on strong customer relationships, competitive pricing, and the highest quality standards.

Our goal is to remain an internationally recognized company, providing reliable support and trusted solutions to our clients.

COMPANY MISSION

Our mission is to provide high-quality solutions that support our clients' business operations through the expertise of our employees and the wide availability of products.

Years of experience and market research have enabled us to understand customer needs, which we successfully meet through an extensive product portfolio. Across our three business units, we maintain a stock of more than 60,000 products, ensuring immediate availability and fast delivery.

Our customers' satisfaction always comes first!

BEARINGS AND ACCESSORIES

We offer a wide range of bearings:

SCHAEFFLER Group (INA / FAG), TIMKEN, NTN-SNR and IKO.

SCHAEFFLER FAG

Schaeffler Group is one of the world's leading manufacturers of bearings and linear motion products, renowned for its innovation, quality and reliability in the industrial, automotive and aerospace sectors.

With over 1838 patents in the field of bearings and linear motion, Schaeffler (INA and FAG brands) is a trusted technological partner for pioneering solutions in all areas of modern rolling bearing technology.

Our product range includes WEG products.

Founded in 1961, WEG is the world's leading manufacturer of electric motors, developing solutions for automation, drive systems, and a wide range of applications across numerous industrial sectors.

WEG is the largest electric motor manufacturer in the world, producing approximately 100 000 motors per day. The world's largest electric motor factory is located at the headquarters of WEG Industries in Jaraguá do Sul, Brazil.

ASTRAPROM d.o.o. is a proud distributor of WEG products in Croatia.

Electric motors ranging from 0.06 kW to 315 kW are available directly from stock at our branches in Samobor, Viškovno, Novska, and Sarajevo, ensuring fast delivery and reliable availability for our customers.

ELECTRIC MOTOR SERIES

MOTORS SUITABLE FOR THE FOLLOWING INDUSTRIES:

- CEMENT INDUSTRY
- WOOD INDUSTRY
- FOOD INDUSTRY
- PHARMACEUTICAL INDUSTRY
- MARINE INDUSTRY
- METAL INDUSTRY

WE CAN OFFER:

- MOTORS IN CAST IRON AND ALUMINIUM HOUSINGS
- ATEX MOTORS - EXPLOSION-PROOF
- FORCED VENTILATION MOTORS
- MOTORS WITH ENHANCED IP PROTECTION
- MARINE-DUTY MOTORS
- MOTORS WITH ELECTROMAGNETIC BRAKES AND ENCODERS

Among our products designed to reduce costs and improve productivity, you can find WEG electric motors that meet the highest standards of efficiency and performance on the market.

Key Features and Benefits of WEG IE4 High-Efficiency Electric Motors:

- Super Premium Efficiency – the highest level of energy efficiency available on the market.
- Advanced Design and Technology
- High-quality materials that ensure long service life and reduced maintenance costs.
- Wide range of applications in compliance with various industrial standards.
- Extensive product range with a wide selection of specifications, power ratings, and features.
- Environmental Standards – energy savings and environmental protection.

GEARBOXES

Astraprom is the official importer of BONFIGLIOLI gearboxes for Croatia, Bosnia and Herzegovina, Serbia, North Macedonia, Montenegro, and Kosovo.

 **Bonfiglioli**
Forever Forward

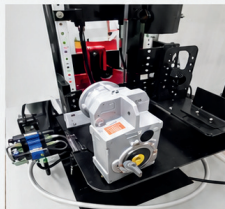

Bonfiglioli has been present on the market since 1956, when its founder, Clementino Bonfiglioli, designed the first VF worm gearboxes. He was also the first to patent a two-stage planetary gearbox. As a leader in the design, manufacturing, and distribution of a wide range of gearboxes, electric motors, planetary gearboxes, and frequency inverters, the company successfully meets the most complex industrial requirements with its comprehensive portfolio of products and solutions.

Bonfiglioli Trasmital is the world's largest manufacturer of planetary gearboxes for both mobile and stationary applications.

For many years, Astraprom has operated as the distributor of Bonfiglioli gearboxes and electric motors in Croatia and Bosnia and Herzegovina, and since 2024, also in Serbia, North Macedonia, Montenegro, and Kosovo.

From May 8-10, 2023, the Bonfiglioli Best Distribution Meeting 2023 was held, where Astraprom received the prestigious "Bonfiglioli Best Partner" certificate. In front of more than 140 guests from around the world at the Enzo Ferrari Museum, Astraprom had the honor and opportunity to mark this exceptional milestone for the company, as well as for all its past and future partners.

A Series – Right-Angle Gearboxes

- Ratio: 1.55 – 1,163.2
- Center distance: 25 – 100 mm
- Output torque: 150 – 14,000 Nm

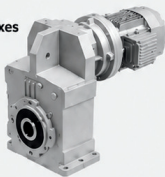

TA Series – In-Line Gearboxes

- Ratio: 2.8 – 1,108.1
- Center distance: 20 – 100 mm
- Output torque: 100 – 12,000 Nm

F Series – Parallel Shaft Gearboxes

- Ratio: 1.64 – 1,209
- Center distance: 25 – 100 mm
- Output torque: 140 – 14,000 Nm

Planetary Gearboxes for Stationary and Mobile Applications

- Ratio: 24 – 120 mm
- Output torque: 1,250 – 2,000,000 Nm

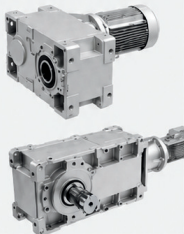

VF Series – Worm Gearboxes

- Center distance: 30 – 250 mm *(depending on the model)*
- VF30, VF44, VF130
- VF150, VF185, VF210, VF250
- W63, W75, W86, W110

HDO and HDP Series

- Ratio: 70 – 250 mm
- Output torque: 5,200 – 2,000,000 Nm

We also offer products from **Varmec and Tramec.**

BELTS AND PULLEYS

V-BELTS

Available in a wide range of lengths.
 Belt dimensions are specified in millimetres (mm).

- 5, 6, 8, 10, 13, 17, 20, 22, 25, 32 | 40 mm
- 5PZ (9,7mm), 5PA (12,7mm), 5PB (16,3mm), XPC (22mm)
- AV/X10, AV/X13, AV/X17
- XPZ (9,7mm), XPA (12,7mm), XPB (16,3mm), XPC (22mm)

TIMING BELTS

Manufactured in metric dimensions in the following profiles:

- T 2,5, T 5, T 10, T 20
- AT5, AT10, AT20
- 2M, 3M, 5M, 8M, 14M
- L, XI, H

Profili: PH, PJ, PK, PL, PM

Poly-micro belts

RENOLD

Chains are one of the oldest forms of power transmission, known for their reliability, durability, and precision. They are widely used across various industries for power transmission, conveying, and lifting applications. We are proud distributors of Renold, a global leader in chain manufacturing.

Sprockets are machine elements that, together with chains, form a chain drive system. They are available in single-row, double-row, and triple-row configurations, as well as with hardened teeth, pilot bore, or taper-lock bushing bore designs.

Our offer includes:

roller chains	
conveyor chains	
leaf chains	
sprockets	single-row, double-row, triple-row with hardened teeth, pilot bore, or taper-lock bushing bore

OLMA®

OLMA, a Slovenian manufacturer of high-quality industrial lubricants, continues a long tradition of developing **reliable solutions for a wide range of industrial applications**. Our advanced formulations are designed to maximize the protection of systems, reduce wear, and extend the service life of machines and equipment. Manufactured with the highest industry standards and using carefully selected raw materials, OLMA products deliver reliable performance even in the most demanding conditions. Through continuous innovation, quality, and a professional approach to solving lubrication challenges, OLMA is a trusted partner to the leading **chemical, pharmaceutical, automotive, food processing, and many other industries** across Europe.

ENERGY EFFICIENCY

Effective use of resources to save costs and energy.

COUPLINGS AND POWER TRANSMISSION COMPONENTS

Couplings are machine components used for the permanent or temporary connection of two shafts in order to transmit torque, compensate for minor shaft misalignments, and reduce torsional vibrations.

Depending on the coupling type and size, they can be used to transmit power up to 1.5 MW and operate at speeds of up to 14,000 rpm.

We offer Timken, Lovejoy by Timken, Sati, Esco, and Desch couplings, power transmission components, and a wide range of other products from their portfolios.

TIMKEN offers high-quality couplings and power transmission components designed for demanding industrial environments. Their solutions ensure reliable torque transmission, vibration reduction, and long service life of industrial drive systems. TIMKEN is a trusted choice for modern power transmission and industrial automation applications. In addition to supplying products, we also provide commissioning, user training, and system testing services to ensure maximum reliability, performance, and operational efficiency of the equipment.

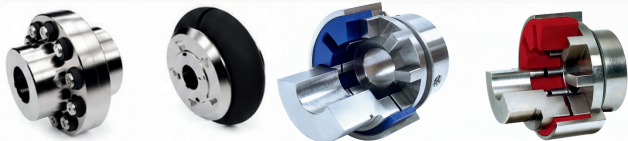

SATI is an Italian company founded in 1974 with the goal of manufacturing industrial gears. Today, its product portfolio includes sprockets, pulleys, gears and gear racks, chains, chain guides, taper-lock bushings, couplings and power transmission components, gearboxes, housings, and belts. Discover SATI's extensive range of high-quality power transmission products through our offer.

ESCO is a specialized manufacturer of industrial couplings, renowned for its high-quality power transmission solutions across a wide range of industries. Thanks to their precision engineering, wear resistance, and long service life, ESCO products are often the preferred choice for high-precision and demanding industrial applications, ensuring reliable performance even under the most challenging operating conditions.

DESCH is a German company founded in 1906, specializing in the manufacture of high-quality power transmission components, including couplings, shafts, housings, and other industrial drive solutions. DESCH offers a wide range of couplings used in various industrial applications, including the automotive, energy, robotics, transportation, and many other highly technical industries. Their products are recognized for their reliability, precision, and outstanding performance in demanding operating environments.

INDUSTRIAL CASTERS

Tellure Rôta is a manufacturer of industrial casters and wheels of the highest quality, produced in Italy with the aim of developing state-of-the-art solutions. The key strengths of this manufacturer lie in in-depth material knowledge and technical solutions, the use of advanced software in the design and engineering process, conceptualization, design and organization, and the most modern equipment for testing and quality control at every stage.

Caster treads can be made of:

- › **Polyurethane**
(high load capacity, resistance to wear and tearing, non-marking, low rolling resistance)
- › **Polyamide**
(resistant to moisture and many chemicals, relatively high load capacity, suitable for smooth floors)
- › **Polyamide**
(resistant to moisture and many chemicals, relatively high load capacity, suitable for smooth floors)
- › **Polypropylene**
(resistant to moisture and many chemicals, relatively high load capacity, suitable for smooth floors, live rollers and cages (less vibration during transport, lower rolling resistance compared to pneumatic wheels))

— POLYURETHANE

— RUBBER CASTERS

— POLYAMIDE

— HIGH TEMPERATURE CASTERS

— SCAFFOLD CASTERS

— POLYPROPYLENE

— PALLET TRUCK ROLLERS

HOSES

We offer a complete range of PVC hoses that are used to transport various media such as water, air, oil, liquids, powdered products and chemicals.

Our hoses are made from high-quality materials: PVC, rubber, silicone, fabric and metal reinforcement. Based on our technical knowledge and experience, we are ready to assist you in selecting the right hose for your specific application.

— WATER

— FOOD INDUSTRY

— AIR

— CHEMICALS

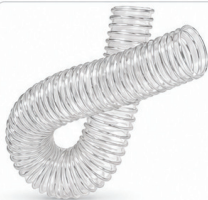

— OIL

SPRAYS AND ADHESIVES FOR INDUSTRY

CRC INDUSTRIES

CLEANING

LUBRICATION

PROTECTION

MAINTENANCE

CRC Industries Europe is a leading supplier of high-quality maintenance products for all types of industry and the maintenance of technical equipment.

The products for cleaning, maintenance and repair of industrial equipment, electrical systems and many other specialized applications are developed to solve problems and meet the requirements of our customers worldwide.

CRC brand products include premium oils, greases, cleaners and anticorrosion products as well as specialized sprays and technical liquids.

LOCTITE

BONDING

SEALING

LOCKING

The globally recognized **LOCTITE** brand is a leader in high-performance solutions for bonding, sealing, locking, cleaning and surface treatment.

We offer a wide range of high-quality adhesives, sealants, lubricants and other chemical products designed to improve reliability, extend equipment life and ensure maximum performance.

LOCTITE products are the trusted choice for professionals who demand durability and preparation for every surface.

SEALING PRODUCTS

BRAIDED PACKING

Braided packing is used for sealing doors on industrial furnaces, boilers, pipelines, low-pressure and dry sealing applications, as well as in metallurgy, coke plants, and thermal power stations. It is widely used across various industries where high-temperature resistance and reliable sealing performance are essential.

TECHNICAL RUBBER SHEETS

Technical rubber sheets are manufactured from materials such as SBR, FPM (VITON), silicone, and EPDM, available in various thicknesses. They are widely used in industry for the production of gaskets, protective components, and technical lining materials. Depending on the application, they are available in smooth, textured, or reinforced rolls and sheets.

GASKET SHEETS

High-quality non-asbestos gasket sheets are designed for use in industrial applications involving water, oil, and steam systems. They offer excellent mechanical strength, safety, and long service life while meeting the highest industrial standards and performance requirements.

RUBBER CORK SHEETS

Rubber cork sheets combine excellent flexibility and elasticity with outstanding resistance to fuels, oils, water, and gases. They are widely used for the manufacture of various types of gaskets and sealing components and can be supplied in different thicknesses to meet specific application requirements.

GLASS FIBER CLOTH

Glass fiber cloth is characterized by high strength, excellent temperature resistance, and resistance to chemical exposure. It is widely used in industrial applications where heat-resistant and fire-resistant materials are required, providing reliable performance under demanding operating conditions.

OIL SEALS (SHAFT SEALS)

Oil seals manufactured from NBR, VITON, and silicone are used to provide effective sealing between rotating and stationary machine components. They ensure lubricant retention, protect against dust and contaminants, and prevent the leakage of liquids and gases, contributing to reliable and efficient equipment operation.

O-RINGS

O-rings are used for static and dynamic sealing in a wide range of industrial applications. Thanks to their simple design, reliability, and high sealing efficiency, they are among the most commonly used sealing solutions in modern industry.

ENGINEERING PLASTICS

Engineering plastics include materials such as polyamide (PA), polytetrafluoroethylene (PTFE/Teflon), polyacetal (POM), polypropylene (PP), and polyethylene (PE). These materials are widely used for manufacturing technical components that offer excellent wear resistance, chemical resistance, and high mechanical strength.

TECHNICAL FELT

Technical felt is used for the manufacture of gaskets and various technical components in industrial applications. It is available in a wide range of sizes and thicknesses, offering good durability, wear resistance, and reliable performance in demanding operating conditions.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

We offer workwear and safety footwear suitable for all types of industries and working environments. Depending on the required level of protection and workplace demands, we provide high-quality personal protective equipment, footwear, and accessories made from durable and functional materials. Our workwear is designed to ensure comfort, breathability, waterproof protection, and resistance to wear, while our protective equipment complies with modern safety standards. We also offer custom embroidery and printing services for selected products to support your company's branding and identification needs.

VENDING

The use of vending machines ensures 24/7 product availability while providing better consumption control and optimizing the costs of personal protective equipment (PPE) and consumable supplies.

- 24/7 Access to Products
- Consumption Monitoring and Control
- Reduced Costs and Material Losses
- Automatic Replenishment and Maintenance
- Analytics and Reporting
- On-Demand Support and Service

VARIABLE FREQUENCY DRIVES (VFDs)

Frequency inverters (VFDs) are devices used for continuous control of electric motor speed, enabling efficient regulation of motor-driven systems.

They are widely used in various industrial applications for protection, monitoring, control, and optimization of electric motors and industrial processes.

The most common applications include heating, ventilation and air-conditioning (HVAC) systems, pumps, and wastewater treatment facilities.

We offer frequency inverters from **WEG** and **Bonfiglioli**.

KEY BENEFITS OF VARIABLE FREQUENCY DRIVES

ENERGY SAVINGS

Motor speed is adjusted to actual demand, reducing energy consumption by up to 50%.

EQUIPMENT PROTECTION

Built-in protection functions safeguard motors and drives against overloads, overvoltage, undervoltage, overheating, and other harmful effects.

PRECISE CONTROL

Enables accurate adjustment of speed, torque, and position, improving process quality and operational efficiency.

SOFT START AND STOP

Reduces mechanical stress and wear, extending the service life of equipment and drive systems.

FLEXIBILITY AND ADAPTABILITY

Easy integration into existing systems with extensive programming options for specific applications.

MONITORING AND DIAGNOSTICS

Provides real-time monitoring of operating parameters and rapid detection of potential issues.

APPLICATIONS

- ✓ Fans and Blowers
- ✓ Pumps
- ✓ Conveyor Systems
- ✓ Compressors
- ✓ Mixers and Agitators
- ✓ HVAC Systems
- ✓ Water Treatment Plants
- ✓ Industrial Machinery and Processes

SALE / RENTAL OF TOOLS AND EQUIPMENT FOR CONDITION MONITORING

We offer for sale and rental:

- Induction Heaters
- Hydraulic Pullers
- High-Pressure Pumps
- Handheld Electrical Tools
- Assembly and Dismantling Tools
- Bearing Monitoring Equipment

WHY CONDITION MONITORING?

EARLY FAULT DETECTION

Identify potential failures before they cause downtime.

REDUCED DOWNTIME

Planned maintenance minimizes unexpected stoppages and costs.

EXTENDED EQUIPMENT LIFE

Proper maintenance increases the service life of bearings and machinery.

SAFETY AND RELIABILITY

Reliable equipment operation improves workplace safety and performance.

COST REDUCTION

Optimized maintenance reduces repair and operating costs.

ANALYTICS AND REPORTING

Clear reports and data analysis support better decision-making.
